

2006 Northwest Agility League

Sponsored by Columbia Agility Team

Week 1 – League Chase

Briefing

League Chase is a game of efficiency and accuracy. Simply follow the course numbers and try not to fault.

Scoring

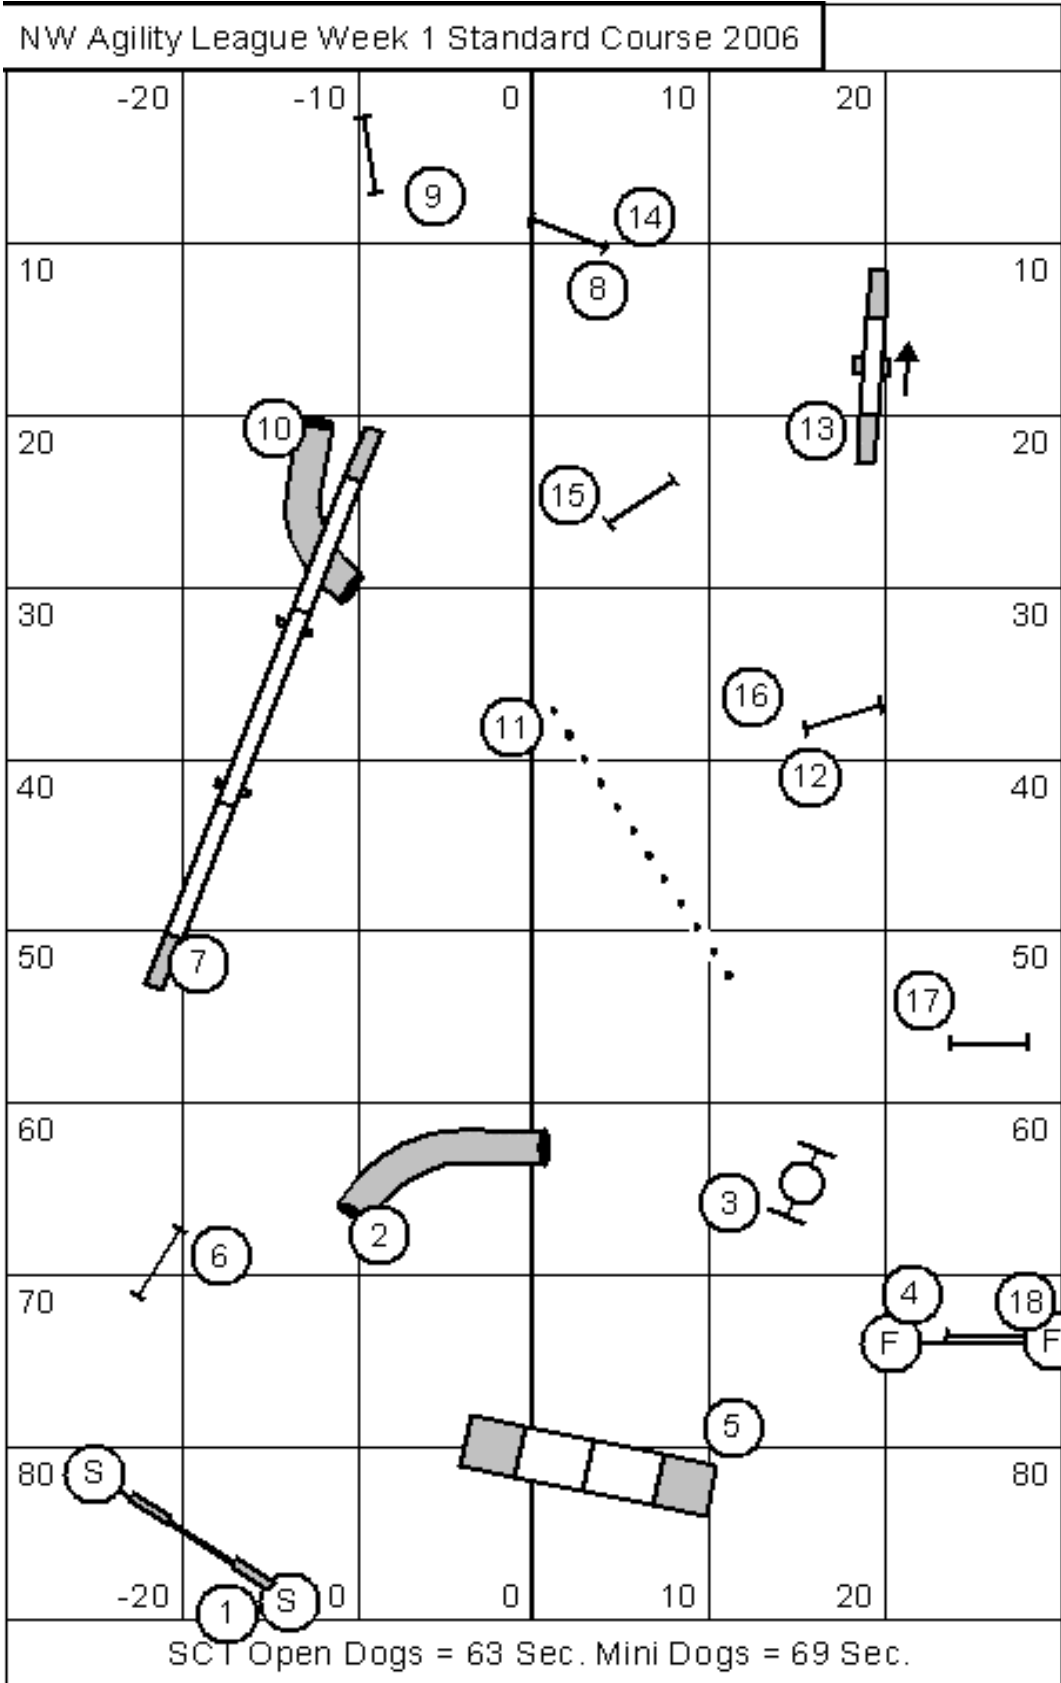

Each dog starts with 200 points. Your starting points minus time (rounded down) and minus any faults equal the score points. Normal League faults apply.

Example:

1. The dog runs the course in 48.70 seconds and has 10 faults.
 $200 - 48$ (time rounded down) - 10 faults = 142 points.
2. The dog runs the course in 28.98 seconds and has no faults.
 $200 - 28$ (time rounded down) with no faults = 172 points.
